

Engineering Major Exploration

Cooper's Will

Who we are

Cooper's Will aims to provide a free program that will help bridge the gap between high school and college education. Peter Cooper once said, "Education should be as free as air and water." But education is not the only thing that we, as educated college students, can provide to the society. By promoting interactions between high school students and college students, we hope to close the vast gap between college and high school, thereby letting high school students have a smoother transition from one stage of their lives to another.

What is engineering major exploration?

Through the program, we would like to provide high school students an opportunity to learn more about engineering. The Cooper Union has four majors in engineering: Chemical Engineering, Civil Engineering, Mechanical Engineering, and Electrical Engineering. Students from each major would speak at the seminar to provide information including but not limited to major-specific courses, internship experiences, applied projects and possible career paths. We want to share our knowledge to help high school students have a better understanding of each engineering major and make an informed decision when choosing a major for college applications.

How to Register

Go to: <http://goo.gl/BydqKv> (Case sensitive)

Limited availability - for this pilot project, it will be based on first come first served.

Where?

41 Cooper Square, New York, NY, 10003

When?

Feb 1st 2015 2:30PM through 4:30PM

Feb 8st 2015 2:30PM through 4:30PM
